EDUCATION

- Vishwakarma Institute of Information Technology** Pune, India
 - Bachelor of Technology - Artificial Intelligence and Data Science ; CGPA: 9.27* Aug 2023 - May 2027
 - Courses: Operating Systems, Data Structures, Analysis Of Algorithms, Artificial Intelligence, Machine Learning, Networking, Databases*

SKILLS SUMMARY

- Programming Languages:** C#, C++, C, Python, JavaScript, SQL, HTML5, CSS3
- Software Development:** Object-Oriented Programming (OOP), Data Structures & Algorithms, Design Patterns, Debugging & Testing, SDLC
- Systems & Architecture:** REST APIs, Client-Server Architecture, Modular System Design, Performance Optimization, ASP.NET MVC, Entity Framework Core, Cloud Computing Fundamentals
- AI / Machine Learning:** Scikit-learn, TensorFlow, Keras, NumPy, Pandas, LLM Integration
- Tools & Technologies:** Git, GitHub, Visual Studio, React, Node.js, MongoDB, ASP.NET Core, SQL Server, Postman, Azure DevOps (Basic)
- Soft Skills:** Problem Solving, Debugging, Unit Testing, Testing, Team Collaboration, Time Management, Agile Scrum

EXPERIENCE

- AICTE – EduSkills (Google for Developers)** Remote
 - AI/ML Intern* Apr 2024 – Jun 2024
 - Overview:** Completed a 10-week program on AI and Machine Learning fundamentals.
 - ML Workflow:** Worked on data preprocessing, model training, and evaluation.
 - Tools:** Used Python ML libraries and Google Developer tools.

PROJECTS

- GlowFox (GitHub):** Developed a full-stack collaboration platform for students and indie developers using ASP.NET Core and React. Designed RESTful APIs, implemented database-driven CRUD operations, and applied Object-Oriented Programming principles to build scalable and maintainable software components. Performed debugging, testing, and version control throughout the development lifecycle. **Tech: C#, ASP.NET Core, React, SQL Server, REST APIs, Git** (Sept 2025 – Nov 2025)
- Obsidian Divide (Play):** Third-person action game developed in Unity featuring advanced enemy AI mechanics and modular combat systems including weapon switching, melee, and magic-based attacks. Outcome playable, enjoyable game and efficient asset pipelines, achieving a 60% reduction in asset size while maintaining visual quality and stable performance.
- AI-Powered Meeting Summarization Tool (Hugging Face):** Developed an AI system that converts meeting audio into concise, structured summaries using LLM-based NLP pipelines. Implemented speech-to-text processing and contextual summarization for real-time note generation. Outcome is deployed an interactive Gradio-based web interface on Hugging Face for public access. **Tech: Python, TensorFlow, Hugging Face, Gradio** (Jan 2025 – Apr 2025)
- AI Job Recommendation System using MCP:** Built an intelligent job recommendation system leveraging Large Language Models (LLMs) integrated with the Model Context Protocol (MCP). Designed semantic matching pipelines to recommend relevant job opportunities based on user profiles and skills. Developed RESTful service integrations and explored interoperability with .NET-based applications for enterprise deployment scenarios. **Tech: Python, LLMs, Transformers, MCP, REST APIs, .NET** (Sept 2025 – Nov 2025)

ACHIEVEMENTS

- Top 10 Finalist – Genesis 5 Game-a-thon 2026:** National Level
- Top 500 Student Developer – IGDC 2025:** Recognized by Unity and Google Play

CERTIFICATES

- Advanced C# Programming in .NET Core:** EDUCBA (Coursera)
- C# Object-Oriented Programming for Beginners in C# and .NET:** Packt (Coursera)
- .NET Full Stack Foundation:** Board Infinity (Coursera)
- IBM Full Stack Software Developer:** IBM (Coursera)

EXTRA - CURRICULAR

- Vice-Chairperson, I2IOC-TPO** VIT, Pune, India
 - Led and coordinated technical, soft-skills training programs, placement drives and mentoring students.* Oct 2024 – Present
- LinkedIn Campus Ambassador** Pune, India
 - Collaborated with industry professionals, and contributed to community of students and developers.* Oct 2025 – Present
